AI-Powered Solution for Brokers & Prop Firms

All-in-One Platform

AIBI

AIBI.GLOBAL

One Platform. One View. Faster, Smarter Decisions.

AIBI.Global helps brokers and prop firms detect risks earlier, retain profitable traders, and grow revenue — in one AI-powered platform, without juggling multiple tools, fragmented data, or manual reporting. **Disconnected systems cost you money**

Most firms today use separate systems for:

- Risk Management
- Abuse Detection
- Client Retention & Sales
- Reporting & Analytics

This results in:

- ⚠ Slow reaction to risks
- ⚠ Missed profit opportunities
- ⚠ Higher operating costs due to multiple licenses
- ⚠ Manual data reconciliation slows reaction and increases error risk

AIBI.Global Brings Everything Together

Risk, dealing, retention, sales, and leadership teams operate on the same real-time intelligence.

One Platform → One Source of Truth → Higher Profitability

15+ analytics modules in one dashboard:

- Retention & Sales Performance Intelligence
- Exposure & Risk Monitoring (Real-Time)
- Margin Protection (Avoid Unnecessary Liquidations)
- AI Predictive Analytics (Trader Success & Risk Forecasting)
- Abusive / Toxic Flow Detection

Not just reports — intelligence that drives outcomes

Two Versions — Same AI Core

AIBI SPARK

For firms with up to ~500 active accounts — early-stage, growing, or lean teams.

- Launch fast — deploy in days, without complex setup or onboarding delays
- No deep analytics expertise required — key insights are generated automatically
- Built-in best-practice analytics — designed from real broker & prop firm workflows
- Budget-friendly for early-stage and cost-sensitive firms — one platform replaces several paid tools
- Grow without hiring — scale accounts and trading volume without expanding headcount or infrastructure

Upgrade To JET Seamlessly As You Grow

SPARK: Enterprise-Level Intelligence, Without Enterprise-Level Complexity.

AIBI JET

Unlimited amount of active accounts — real-time oversight and full customization for brokers and prop firms.

- Always up to date — new improvements and features are rolled out automatically
- Unlimited active accounts — engineered for high-volume operations
- Fully customizable dashboards and analytics logic — adapt the platform to your workflows
- Works with all major trading platforms — flexible and stable integration
- Unified real-time environment — a single source of truth across the organization
- Enterprise-grade access controls — align data visibility with roles and responsibility

JET: Full Control, Profit Protection, Strategic Clarity — At Scale.

Proven Results with Real Brokers & Prop Firms

AIBI.Global's analytics engine has already delivered measurable increases in profit, reduced losses, and strengthened retention across firms of different sizes.

JET is the upgraded, more powerful version of this analytics core — meaning the results below are a baseline of what the system already achieves. With JET, these outcomes scale even further.

Prop Firm (~12,000 accounts)

+$4.7M — 1,033 margin call upgrades (over 2 years)

+$1.94M — net profit from capital allocation optimization

+$448K — saved by blocking toxic trading / scalpers / latency abuse

Prop Firm (~1,200 accounts)

+$138K — net profit from improved capital allocation optimization(1 year)

+$220K — additional revenue from 46 margin call upgrades

~63% — retention — ~13 percentage points above the market average.

Next Step

Whether you're scaling an established organization or building a lean, fast-growing team — we'll help you choose the version that fits your stage:

JET
Enterprise-grade platform for brokers and prop firms scaling in volume and complexity

SPARK (Coming soon)
Same intelligence core, optimized for lean teams and early-stage firms

We'll be happy to walk you through our current setup, discuss challenges, and show how our platform can increase profitability, strengthen risk control, and improve trader retention.
