# OUR GLOBAL PRESENCE

We work with clients across the US, South America, Europe, the Middle East, and we're expanding into Asia and LATAM markets.

# WHAT'S HOLDING BROKERS AND PROP FIRMS BACK

Workflow hurdles slow down decision-making, increase errors, and hinder growth.

01

## Money lose

due to toxic traders and latency arbitrage

02

## Uncontrolled exposure

leading to unexpected losses

03

## High-value clients leave

before teams can react

04

## Missed revenue

due to lack of client insights

05

## No clear visibility

over business performance

06

## Decisions are made too late

to make an impact

# HOW AIBI.GLOBAL SOLVES THESE CHALLENGES

AIBI.Global provides seamlessly integrated analytics platforms with real-time reports and actionable insights across risk, sales, and client behavior — giving you full visibility and control over your business performance.

Know exactly where you lose money, where you can grow, and how to act on it.

Detects toxic trading early with advanced analytics

Provides real-time visibility over exposure and risk

Identifies at-risk clients before they are lost

Delivers actionable signals for sales and retention teams

Unifies trading, sales, and risk data in one system

Enables faster, data-driven decisions

# DATA ANALYTICS SYSTEM

The core analytical framework behind **SPARK**, **FLAME** and **JET**

SPARK, FLAME, and JET share the same core data analytics but each is tailored to different business growth stages.

Our platforms include 15+ interactive reports covering trading activity and behavior based analytics, risk and exposure management, management KPIs, and sales performance. Our unified platforms enable brokers and prop firms to reduce risk, optimize operations, and grow profitability at every business growth stage.

15+ interactive reports

# MEET OUR PROPRIETARY AI MODELS

What makes our AI models unique is that our models have zero dependency on any other existing AI. We have built and trained our models on vast data bases ourselves.

## First AI Model

Built and trained to predict client profitability after just **10 trades with 93% accuracy**, suggesting A/B book allocation for brokers.

**For prop firms**, this model assesses whether a trader is likely to pose higher or lower risk over time.

### ✔ How does it benefit our clients?

It reduces the risk of trader misallocation and the risk of misinterpretation thus reducing the risk of profit loss.

## Second AI Model

Analyzes the last **50 trades** and determines if trading patterns have shifted to risky or low risk trading. Then it suggests book reallocation if necessary.

**For prop firms**, this model reveals traders that require closer attention.

### ✔ How does it benefit our clients?

It insures that their traders are in the right books, reducing the risk of capital loss.

## Third AI Model

Coming soon

Predicts when a client is most likely to trade each day, based on their historical behavior and trading data. It identifies a precise time window for expected activity enabling precise monitoring and timely decision-making.

**For prop firms**, this model identifies key activity windows and engagement patterns.

### ✔ How does it benefit our clients?

Brokers and prop firms can anticipate trader activity, engage traders, and boost trading activity

# FIND THE PERFECT SOLUTION FOR YOUR BUSINESS

## SPARK

Built for take off

Includes 1 000 active accounts

- ⚡ Standard reports plus core AI insights
- ⚡ Standard metabase dashboards
- ⚡ Standard setup
- ⚡ Deployment in hours
- ⚡ Standard support
- ⚡ Integrates with all major trading platforms

Best for:  
newly launched brokers and prop firms

## FLAME

Built for scale

Includes 3 000 active accounts

- 🔥 Extended reports plus multiple AI reports
