ARTIFICIAL INTELLIGENCE AIBI BUSINESS INTELLIGENCE

SPARK

AI-powered data analytics solution
for brokers and prop firms

https://aibi.global ↗

Instant deployment

Cost-efficient start
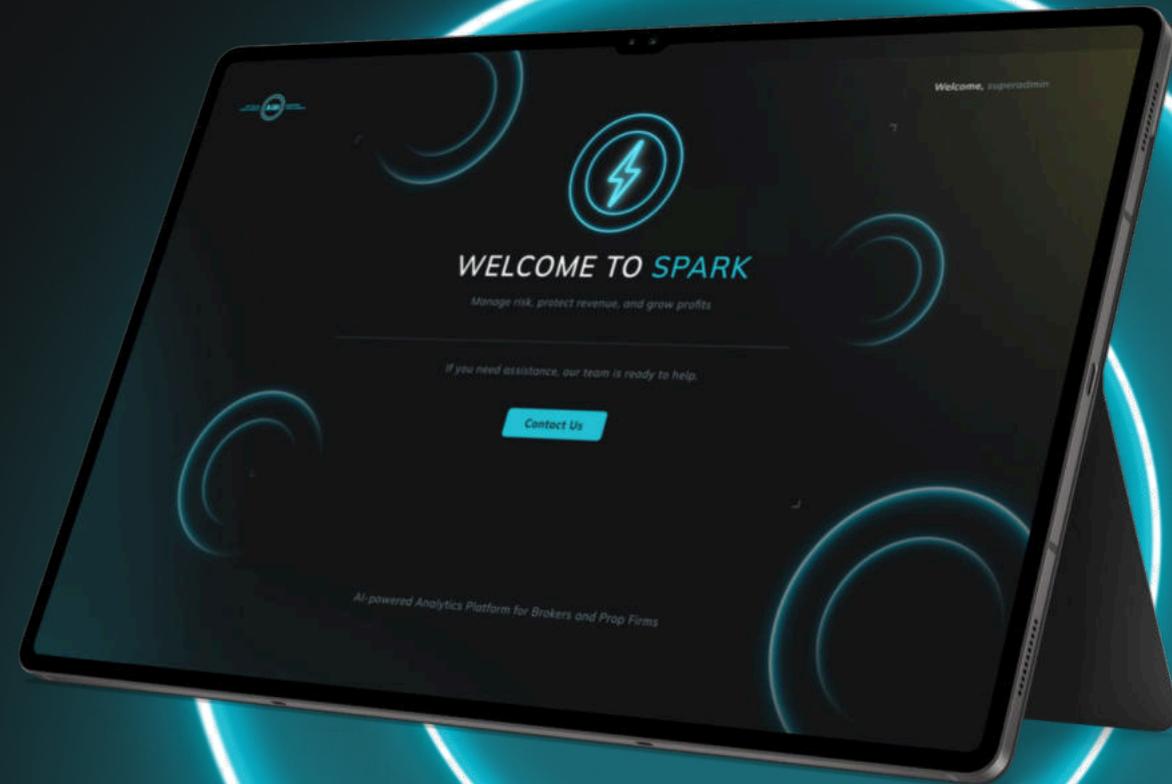

Full visibility of core data

Clear signals

Grows as you grow

A NEW APPROACH TO ANALYTICS AND RISK MANAGMENT

SPARK is a newly introduced AI-powered data analytics solution.

It delivers ready-to-use analytical reports for clear risk and trading insights, designed for daily operational use.

SPARK is powered by proprietary AI models, trained specifically on broker and prop firm trading behavior

WHAT SPARK HELPS YOU SEE AND CONTROL

SPARK gives teams immediate visibility into decision-critical metrics.

Scalping and suspicious trading pattern detection

A-book / B-book signals powered by AI

Margin and client activity monitoring

Sales opportunity and client engagement signals

WHY WE BUILT SPARK

To make data analytics practical from day one

SPARK was created for firms that need clear, actionable data analytics, without the usual trade-offs of traditional platforms: long deployment cycles, high upfront costs, and the need to restructure internal processes before seeing real value.

SPARK removes trade-off friction and gives you practical analytics and risk management from day one.

Key advantage #1
### Nearly instant deployment

Key advantage #2
Immediate access to core analytics

Key advantage #3
Lowest subscription price on the market

Key advantage #4
Clear, actionable data insights without heavy implementation

WHO SPARK IS BUILT FOR

SPARK is built for brokers and prop firms at early and growth stages, providing practical data analytics without the overhead of enterprise-grade platforms.

SPARK works best for firms that

01

Need clear, reliable analytics across active trading operation

02

Value speed, clarity, and easy adoption

03

Want actionable insights without long configuration or development cycles

It's a strong fit for teams that want immediate results at a low cost.

TWO SOLUTIONS. DIFFERENT DEPTHS OF ANALYTICS

SPARK and JET are built for different analytical needs and different stages of growth.

SPARK can be used independently, or as a natural first step before scaling up to JET when your operations need broader automation and deeper analytics coverage.

SPARK

Fast, focused data analytics solution built for immediate use

JET

Deep analytics, advanced flexibility, and enterprise-scale control

BUILT FOR CLARITY, NOT COMPLEXITY

With SPARK, teams get:

A ready-to-use data analytics solution with practical reports that goes live instantly and works from day one.

No team training required

Lowest subscription price on the market

- ✓ See sales signals and key KPIs early
- ✓ Respond faster to abusive and high-risk trading behavior
- ✓ Run analytics without complex implementation
- ✓ Track changes in client and trading activity
- ✓ Enable confident decisions across teams
